

# Florida

Florida is the third most populous U.S. state with 19.8 million people, and has the longest coastline (1,350 mi. / 2,170 km) in the contiguous United States. For this Tour, we first head to the popular Gulf Coast Island of Sanibel followed by the beach area of Fort Myers, before winding up down town.

These drives were filmed by Miriam Monahan, founder of Drive Fit. While Dr. Monahan is a Vermont Certified Driving Instructor, she appears equally at home driving the roads of Florida. Be sure to notice the distance she leaves to the car in front when stopping.

Florida is known as the land of gators. We don't see any gators in these drives, but we do see lots of water and a very brave bird walking across the road.

**Enjoy your Tour!**
